**About Catherine Short**

**Fun Fact:**  
Excels at gardening, and is addicted to pruning her tomatoes and deadheading roses. She fights the urge to stop and take care of roses that she drives by if they are covered with dead rose heads (or to pass judgement on the owners). She despises all insects, especially slugs. She would co-exist with a garter snake in the garden because they eat slugs. Worms are fine, they can stay because they till the soil.

**Favorite Podcast:**  
Loves NPR and especially Ira Glass on This American Life.
